Evaluation of numerical integration

The following table reports sample values and squared values. The integral of the squared variable on the unit interval is shown below.

Sample measurements		
Sample	x	Squared value
A	0.0	0.00
B	0.5	0.25
C	1.0	1.00

Table 1. Values for the integration example.

The exact result of the integration is

$$\int_0^1 x^2 \, dx = \frac{1}{3} \tag{1}$$

This controlled example checks model wiring and output preservation.
